Attachment(s)

1) ☒ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____ .
4) ☐ Interview Summary (PTO-413) Paper No(s). _____ .
5) ☐ Notice of Informal Patent Application (PTO-152)
6) ☐ Other:

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hitchcock et al. in view of Mitsuhashi et al.

Hitchcock et al. disclose the invention substantially as claimed. Hitchcock e al. disclsose an alloy in the Abstract (percents in wt%) comprising:

0-3% carbon;

0-1% Mn;

0-3% Si;

10-35% Cr;

0-22% Ni;

0-20% W;

0-3% B;

0-10% V;

0-20% Fe; and

bal. of Co.

Hitchcock et al. disclose these elements that completely overlap or closely approximate the claimed ranges of Applicant.

Hitchcock et al. further discloses wherein additional elements of Nb and Mn are present in amounts that include 0%.

However, Hitchcock et al. is silent as to adding amounts of rare earth metal elements including La.

Mitsuhashi et al. teaches to add rare earth elements including La in an amount of 0.02% or 0.04% at col. 5, lines 18-26 and in Tables 3-6 in the same field of endeavor for the purpose of improving high temperature oxidation resistance.

It would have been obvious to one having ordinary skill in the art at the time of the invention to add La in an amount of 0.02% or 0.04% in the invention of Hitchcock et al. for the purpose of improving oxidation resistance of the alloy.

4. Claim 3 is allowed, the prior art not disclosing or making obvious the addition of 27-30% Mo in the claimed Co based alloy composition.
